List Accounts

This interface lists your server’s accounts and lets you perform certain actions on them.

Process Manager

This interface displays your server’s active processes and lets you trace and kill any processes.

Create a New Account

This interface lets you create new cPanel accounts.

DNS Zone Manager

Manage DNS zones, including adding and removing records from a zone.

Terminal

This interface provides an in-browser terminal for direct command line access within a WHM session.

Mail Queue Manager

This interface lets you view, delete, and attempt to deliver queued messages that the system has not yet delivered to their destinations.
